

A3 Security System

Security Assessment Report

Generated: 2026-06-13 14:27:14 • Period: Last 30 days

Executive Summary

During the reporting period, A3 monitored 1 processes and sandboxed 9 files. **2 malicious** and **3 suspicious** files were identified. 8 devices were detected on the network, 0 of which are high-risk. The threat intelligence database contains 1,027 known malware hashes, 532 malicious IPs, and 7,641 malicious domains.

Overall Risk Level: MEDIUM

Key Metrics

Processes Scanned1	Files Sandboxed9	Malicious Found2	Suspicious Found3
Network Devices8	High Risk Devices0	DNS Queries Logged0	Blockchain Blocks6

Threat Detections

File	Verdict	Type	Score	Action	Time
test_risky.py	MALICIOUS	trojan	110	quarantine	2026-06-02T09:08
test_suspicious.py	SUSPICIOUS	trojan	50	quarantine	2026-06-02T09:08
test_suspicious.py	SUSPICIOUS	trojan	30	quarantine	2026-06-02T09:08

Network Device Inventory

IP Address	Vendor	Score	Open Ports	Flags
192.168.1.2	unknown	40	Modbus	unknown_vendor, high_risk_port:Modbus
192.168.1.1	unknown	30	HTTP	unknown_device, unknown_vendor
192.168.1.7	unknown	25	—	unknown_device, unknown_vendor
192.168.1.3	unknown	25	—	unknown_device, unknown_vendor
192.168.1.8	unknown	25	—	unknown_device, unknown_vendor
192.168.1.4	unknown	25	—	unknown_device, unknown_vendor

192.168.1.9	unknown	25	—	unknown_device, unknown_vendor
192.168.1.5	unknown	10	—	unknown_vendor

Blockchain Evidence Ledger

All 6 threat records are cryptographically chained and tamper-proof. Any modification to historical records is immediately detectable via hash validation.

Block #	Type	Verdict	Timestamp
5	threat	MALICIOUS	2026-06-11T10:05
4	threat	SUSPICIOUS	2026-06-11T10:05
3	threat	MALICIOUS	2026-06-11T10:05
2	threat	SUSPICIOUS	2026-06-11T10:05
1	threat	SUSPICIOUS	2026-06-11T10:05

Recommendations

- [HIGH]

Review and remove all quarantined malicious files immediately.
- [INFO]

Keep threat intelligence feeds updated — run `python3 core/threat_feeds.py` weekly.
- [INFO]

Validate blockchain integrity monthly — run `python3 core/blockchain.py --validate`.
- [INFO]

Retrain ML model after significant new threat data accumulates.
